Personal Skills and Competences

Social skills

Cooperative learning skills.

Organizational skills

Excellent organization skills: TPS, FIFO, JIT, 5W2H, 5S.

Technical skills

Good knowledge about Technical Draw both in understanding and in drawing;

Extension and Software known: Joomla!, 3DGraphis, Blender .blend, Slic3r .STL, .3ds, .X3D, .xls .calc VBA, .SVG, Data Analysis, Data Recover, OS Performance, phpMyAdmin, LAMP, OpenSources, sOffice Suite, MassMail, Maps, API

Varies skills and expertise in operating CNC Machines to produce parts;

Good knowledge of PCs structure and peripherals;

Discreet knowledge of Windows OS Windows;

Good knowledge of *nix OS, debian Linux;

Discreet knowledge of Local Area Networks.

Computer skills

Good knowledge of Office packages preferring those from opensource as Libreoffice;

Good knowledge on Operative Systems such as Windows, Ubuntu, Linux Debian;

Good Knowledge about CMS Content Management System (Joomla!); Knowledge LAMP environment MySql (Linux, Apache, MySql, PHP);

Good knowledge Opensource software and it's use on Web and Office;

Excellent knowledge of Internet and its resources;

Understanding Programming in HTML, BASIC, BASH, VBA;

Good graphics capability (2D "GIMP, Corel"; 3D "Blender").

Technical Drawing 2D and 3D (Blender) and Freehand;

Computer 3D graphic.

Artistic skills

Continuous training and updating.

Other skills

Driving licence

Driving licence categories

B/C/D

Additional information and annexes

Personal presentation

My name is Amerigo D'Angelo, married, father of two, actually teacher in 3d Printing, however searching a more stable employment.

I have worked on assembly and production lines and I have a fair amount of manual skills in woodworking and metalworking.

I carried out various tasks such as: production of mechanical parts, receipt of goods, coordination with the production line and with suppliers for the procurement of parts, internal control of market quality.

Subsequently, I dealt with reports for market complaints, their drafting and corporate communication, hardware and software maintenance with mainly "open source" solutions, in various areas.

I use OpenSource computer systems such as Linux and technology in a global sense, and I use them to produce parts, and systems for personal and semi-professional use.

In this sense, I have worked as a freelancer to provide IT services to the public.

After this phase, due to the transfer of headquarters, I no longer considered it convenient to continue with this activity: I looked for and carried out the jobs that presented themselves to me and mainly as a courier.

Due to jobs, often underpaid and with shifts of up to 14 hours a day, as a family we decided to open a fish shop. After the crisis in the sector already underway in the pre-covid periods, we chose to block the activity at least for some time, but with the advent of the lockdowns due to the pandemic there was no way to start again.

In complex environments, I organize myself according to the procedural practices known as TPS (Toyota Production System).

I believe in training and learning as essential values in the profession.

Immediately available to work in shifts, with a car, I thank you and look forward to your feedback.

Desired Employment

I'm interested in:

Employer, Warehouse, Developer

Expected salary: (Indicate currency, if relevant)

Other requests

Available for a period of temporary employment in order to assess the actual suitability for the role.
